

HOME OF 2030

Room to expand

And extension could be possible on this building as it is big enough although the price would rise.

Recyclable slate roof

Sustainable and recyclable meaning it is better for the environment.

Durable Timber cladding

High insulation and lasts for a long time. Timber is also sustainable.

Sedum roof

Reduces noise and air pollution and provides a habitat for animals.

Technological burglar alarm

This alarm comes with an app for your phone which alerts you when an intruder enters your house.

Extremely affordable

Made for a young couple possibly for a first house meaning it would be more affordable.

Off site manufacturing

This means that the building is made in nice conditions meaning it is my enjoyable for there builders.

HOME OF 2030

Smart automated lighting

Your lights will come on with just a click on your phone.

Connecting electrical devices

This means your appliances connect to your phone or device.

Thermostat heating control

You can control the temperature of just one room or the whole house and even adjust your radiators with an app on your device.

Only three rooms

There are only three rooms downstairs making it affordable but accessible.

Only one bedroom and bathroom

This house has all of your basic rooms but still has more to offer with its amazing smart technology!

Designed and constructed off site

Deigned using minimum standards but turns out even better than your usual house and even more affordable.
